## BOTTOM OF THE LOAD ORDER

lowest priority — the maps sit here

## NOTES

a few of these have no public download page

**Sneaks Resource Pack v2 —** a shared resource file that comes bundled when you buy any Sneak's yard — it has no page of its own. You get it from the Sneak's customer portal after purchase.

**ATS Kenworth K100E CE 1.3 —** a Crash Editz build, shared through the Pauly's Custom Skins Discord — same as the Strator. MrOverfloater's original K100E is on the Steam Workshop if you'd rather use that.

**Alaska NTTF - Midnight Sun Addon —** an optional file inside the paid Alaska North to the Future download (the alternative is True Winter Climate) — it isn't a separate purchase.

**Alaska - North to the future —** this one is a paid map (about $30 from the official site) — easily the most expensive thing in my setup, so treat it as optional.

**Radiator Springs FIX —** this is the current GMC fix (v1.61-1.0.0), straight from GMC. Don't use the copy on TruckyMods — that one is from 2022 and the author has marked it obsolete.

**El Paso Yard —** I've had this one a while and can't track down where it came from — it isn't in Sneak's current catalogue. Skip it if you can't find it; nothing else depends on it.

**Sneak Master Open Def —** same as the resource pack — it ships with a Sneak's yard purchase and has no page of its own.
