Weekend Trucker Members Mods list

Euro Truck Simulator 2 & American Truck Simulator (v1.61) · Updated 18 October 2026

A **directory of every mod in my setups for both games** — grouped by type, each with a direct download link. ETS2 first, then ATS. (My exact in-game load orders are separate lists.)

One-stop mod directory for ETS2 + ATS · every download linked · grouped by category.

☑ Read this first

- **Load order matters.** A mod in the wrong slot is the top cause of crashes — my exact orders are in the separate ETS2 and ATS load-order lists. This page is the *directory*: what I run and where to get each one.
- **You need the map DLCs.** ETS2: all 10 (Going East!, Scandinavia, Vive la France!, Italia, Beyond the Baltic Sea, Road to the Black Sea, Iberia, West Balkans, Greece, Nordic Horizons). ATS: the big map combos want every released state DLC.
- **Some maps are paid** (ProMods supporter early access, PNG PhotorealisticExperience, ADG addons). I've marked those **£ Paid**. Everything else is free.
- **Stay safe downloading.** Mod sites are ad-heavy and some fake "Download" buttons are malware — nasty people do nasty things to get hold of your data. Run an **ad blocker** (uBlock Origin is free and excellent), only ever click the *real* download link, and **scan every file** before you open it.
- **Links:** where a download needs a free account (ProMods, RoExtended) or is a Steam Workshop subscribe, I've said so. For the smaller mods I've pointed at **TruckyMods** or **Sharemods** — they host files directly, with far less of the redirect-and-pop-up mess you get on sites like ets2.lt.

🧮 Apps I use

The tools I actually run to keep this setup working:

- **Truck Mod Doctor** (paid) — scans your mods, **automatically sorts the load order**, flags conflicts and missing connectors, and applies it to your profile for you. It's what keeps a big 129-mod combo like this from crashing. → truckmoddoctor.com
- **Truck Crash Doctor** (free) — the companion app. When the game crashes, it reads your crash log and **tells you exactly which mod caused it**, so you're not left guessing. → truckmoddoctor.com

---

EU PART 1 — EURO TRUCK SIMULATOR 2

📦 The ETS2 Mod Library (grouped by download)

Each entry below is **one thing you download**, and the link goes **straight to that mod's page** — no searching. Big mods like ProMods come as several files from a single download.

🔑 = needs a free account · **£ Paid** = costs money · ⚠️ = read the note.

🗺 Maps — the big ones

Mod	Author	Version	Direct download
ProMods Europe (8 packages)	ProMods Team	2.84	**£ Paid** — store.promods.net
ProMods Middle East	ProMods Team	2.84	**£ Paid** — store.promods.net

AI Traffic

> **Jazzycat & TrafficManiac packs:** the ModsFire links below are the authors' own uploads (1.61 builds). Some packs come as a zip holding three files — the main file (or `_base`), a `_def` file ("for default traffic") and a `_jaz` file ("for Jazzycat's AI Traffic Pack"). Keep the main file switched on and use **only one** of `_def` / `_jaz` — never both. Running the AI Traffic Pack? Use `_jaz`.

Mod	Author	Direct download

Recommended Plugins (ETS2)

Plugins are different from mods. A plugin is a `.dll` file that hooks the game engine — it does *not* go in the mod folder. There are **two install spots**, so always read the plugin's own README:

- **Telemetry (dashboard) plugins** → `…/bin/win_x64/plugins/` (create the `plugins` folder if it isn't there)
- **Graphics / fix plugins** (Snowy Moon, PrismCacheFix) → directly in `…/bin/win_x64/`

> ⚠️ **Golden rule:** plugins are unofficial engine DLLs. Only download them from the developer's own site or GitHub, expect the odd antivirus false-positive, keep them **out of TruckersMP** unless the plugin says it's supported, and if the game crashes or a save won't load after a game update, **remove the plugins first** and grab updated versions. None of these are required to play — each earns its place only if you want the specific feature.

For a live dashboard on your phone or second screen

Plugin	What it does	Get it	Cost
SCS SDK Telemetry Plugin (RenCloud fork)	The foundation almost every dashboard app needs — exports live speed/fuel/route/job data. Actively maintained for current game versions.	github.com/RenCloud/scs-sdk-plugin → Releases	Free
ETS2 Telemetry Web Server (funbit)	One-download dashboard you open in any phone/tablet browser. Bundles its own plugin, so it "just works."	github.com/Funbit/ets2-telemetry-server	Free

Install spot: …/`bin/win_x64/plugins/`. ETS2 shows an "SDK activated — press OK" box on launch; that's normal. If a dashboard won't connect, this plugin (or its folder) is usually why.

For better visuals

Plugin	What it does	Get it	Cost
Snowy Moon — Lighting Improvements	The go-to lighting plugin in 2026 — improved lighting, better anti-aliasing (TAA/DLAA/DLSS), optional motion blur, no DX12 needed. **This is almost certainly the "Snowymoon plugin" the PNG Rain add-on asks for.**	snowymoon.io (via Patreon)	Free / ~$1 Patreon

Install spot: DLLs go **directly in `…/bin/win_x64/`** (not the `plugins` subfolder) and launch the game in **DirectX 11** mode. Windows 10/11 x64 only. As a graphics-injection DLL it can trip antivirus and should **not** be used in TruckersMP. Re-check after every game patch.

Situational fix

Plugin	What it does	Get it	Cost
PrismCacheFix	Fixes a Prism3D cache issue that can stop saves loading or break the in-	github.com/Baldywaldy09/Prism3D-Cache-Fix → Releases	Free

Plugin	What it does	Get it	Cost
	game game console — usually after an update or save-editing. Niche; only if you hit that bug.		

Install spot: the `.dll` goes directly in `…/bin/win_x64/` (confirm in the repo README). Remove it first if saves misbehave after a patch.

> **A note on "Project ALM":** it's often mislabelled a lighting plugin — it's actually **"Advanced Local Mods,"** an Insanux tool that makes local `.scs` mods work inside TruckersMP. Only get it from the official Insanux site, and know that anything bending TruckersMP's mod rules carries some account risk — so I'd only reach for it if you specifically play modded TMP.

US PART 2 — AMERICAN TRUCK SIMULATOR

The ATS Mod Library (grouped by download)

Same rules as ETS2: one entry = one download, every link goes straight to the mod's page. My ATS combo is the Canada / North-America setup — ProMods Canada + the Canada Expansions + Coast to Coast + Beyond + Reforma.

Maps — North America

Mod	Author	Version	Direct download
ProMods Canada (4 packages: def, map, assets, models)	ProMods Team	1.6.4	promods.net
Beyond by TerraMaps for ATS (4 packages)	TerraMaps Team	V11	terramaps.net — free + paid Premium
